

Senior Consultant

Life Sciences, USA

WCI Consulting Limited is a management consultancy operating in the Life Sciences sector. Our clients are leading life science organisations including those working in: Pharmaceuticals, Biotechnology, Consumer Health, Medical Devices, and Dietary Supplements.

Growing demand requires the continuing expansion of our consulting team. Our current assignments focus on enhancing performance in a range of heavily regulated business activities, including:

- Patient Safety and Pharmacovigilance
- Risk Management
- Quality and Compliance

Key to our success with our clients is our knowledge of their environment and our ability to work with them to implement operational improvements which, in turn, reduce complexity and improve compliance.

Job Site: Primarily in New York, NY, but travel may be required to various client sites as needed for consulting assignments

About the Role: Leading consulting assignments at client premises. Analysing and re-engineering client processes and systems. Training clients in company's techniques. Managing customer satisfaction. Continuing to develop company's methods and products.

Experience Requirements: The applicant must have five years experience in the business consulting industry in a business analyst role specific to the pharmaceutical industry, in Safety Systems, Signal Detection, Risk Management, Regulatory Reporting, Labelling, and Validation Principles. Experience in SQL, XML, BI tools, Documentum, and SharePoint. Experience can be gained concurrently.

Education Requirements

- Bachelor of Sciences in Technology, Business, or Biochemical Engineering (or foreign equivalent)

If you would like to apply for this position, or would like an informative discussion about the role, please send your contact details, together with your resume to:
